Nice to see you!

ello, nice to meet you! Right now we have gone to the beach and as you can see, and it is winter. There is snow and the sea is frozen. Just in case we have not met before, let me introduce us.

From left to right (as the arrow points) it is first, me, the Professor. I am a Scottish Deerhound. I want to know about everything, my nose is brilliant at finding things. In the middle is Box-Head, who is an Irish Wolfhound. He is chaotic and funny. Then there is Handsome, a noble Borzoi who does not like to be touched by humans he does not know. He thinks he is very clever. You may also remember Grandpa - Dog, but he suddenly got ill and passed away from us. I told you about that in Book 3.

Right now we are at the beach which is one of my favorite places. As you can see the snow is quite deep, our long legs almost seem to disappear in all that snow.

The sea is frozen, but we would not go in it anyway. The snow is much more fun, it requires a lot of energy to race around when it is so deep.

We will be tired when we get home but for now I jump of joy!

ur Human has taken us home from the beach now, we are tired, but he seems excited about something. He has been busy on the Bell-Thing the last few days, and he seems restless. That could mean something is going to happen. I will better keep an eye and ear open, even if I am tired after the walk to the beach and all the fun there. Suddenly the Bell-Thing rings, and he picks it up and talks to it. There is also another Bell in this house. A Door-Bell. For us dogs it is more fun. It means visitors! The talk-Bell thing is more boring to us, but he only speaks briefly this time. He gets even more restless now, and tells us to go into the living room, where he seems to prepare some papers.

Then the Door-Bell rings! He rushes to the door and closes the door to the living room, but I knew something was going to happen, I manage to get through, I will not miss this! He opens.....

So, who is at the door? Wht will happen?

Of course you get the answers in the Professor's book!

Beauty and me. We start to play!

Box-Head and Beauty at the gate.

The Treasure map

at-Mum's home is always a nice place to drop in. Sometimes, like today, she knocks on the window to tell us that she has seen us, and that we are meant to come in. Our Human has taken me together with... **What will Cat-Mum soon discover?**

At first she thinks she saw Handsome beside me from her window, but then she gets all excited when we come into her kitchen and she realizes that..... **What does Cat Mum realize?**

Cat-Mum is experienced with dogs. Her husband who died many years ago, was a police officer and they had a German Shepherd dog named Basker. Cat-Mum often talks about Basker.

Cat-Mum knows better than to start to pet Beauty straight away.

Instead she finds some goodies for us. That is also a good thing about visiting Cat Mum.

Beauty was a little nervous at the start of our visit, but soon she too finds it interesting.

We all love Cat-Mum

Then Cat-Mum talks about my clever nose, and that she wonders if....? There is something she wants to show us. Cat-Mum has a lot of books. She also used to work in a museum. Actually it was our local city museum that is part of a large castle!

Then they get a treasure map, but what does that result in?

Do they really find a treasure?

There is a hole in the ice. Beauty is in the cold water, and she can't get out of the hole! She cries and cries. For a moment, nobody knows what to do.

If we go out we will end up in the same mess, but we must help Beauty!

They are out for a walk, a dog has broken trough the ice. What will they do? Of course you will be told what happens

The Professor - Cat Mum's treasure map!

It is the fourth book in the series.

Handsome has let Their Human arrange an experiment, a Shepherd dog has drowned. But is it so bad as it sounds?

Humans and dogs will not sink to the bottom in water, but it is cold and dangerous because we can't get out again. I hate to get my nice coat wet!

Box-Head, how could you ever say this is fun? Well let's get on with facts!

Our Expedition

Early one morning I notice that something is different, our Human behaves differently. Like when I went to the Animal Hospital. It's different, because our Human seems to be in good mood. We get something to eat, then we usually all go out together, but this morning he leaves me behind at home, only taking the other dogs, and I am left all alone at home. Of course I object to such treatment.

I Howl!

What is going on? Why does he only take them out, leaving me on my own at home?

I howl again!

It is not that I do not like to be alone at home. There is a good sofa to sleep on, that is fine with me. It is just that Our Human takes the other dogs out to experience something that I am missing out on! Me, who wants to know about everything!

So then, what is a sofa good for when I can't really relax anyway?

At least I hope they can find their way home again without my help.

An expedition without the Professor. Impossible! Where are they going?

ood Morning! It was a nice night in the bed with Our Human. Box-Head seems to have forgotten my maneuver, he is happy as usual. I am all excited, because we will surely be going to Cat-Mum today and show her the results of yesterday's scientific expedition.

Here Cat-Mum sees the result of the Professor' expedition.

Then she starts to explain!

Cat Mum says: "Now let's see what you've got there!"
